

Pham Duc Thinh

Data Engineer

HCMC | (+84)522397422 | thinhhpham1807@gmail.com | [LinkedIn](#) | [GitHub](#)

EXPERIENCE

NAB Innovation Centre Vietnam

06/2026 – Present

Product Data Engineer - StarCamp Batch 22

- Built **Lakeflow pipelines** for transaction investigation data supporting fraud detection workflows in **Databricks**
- Developed **PySpark** for **Bronze-to-Silver ingestions and transformations** across **27 Delta tables** for analytics-ready datasets.
- Implemented **PII masking, lineage, and governance controls** for secure data consumption.
- Created **30+ data quality and reconciliation checks** to improve dataset reliability.

Vietnam Silicon

09/2025 – 02/2026

Data Engineer - Intelligent Insights Navigation System

(Promoted from Intern to Full-time Fresher based on outstanding performance)

- Contributed to the **ELT pipelines** by using **Airflow + AWS S3 + Glue** to ingest and process **agriculture and hospitality data** on **+1M records daily** to support analytics and data science use cases, enabling reliable data delivery
- Modeled hospitality data into a **star schema**, using **dbt** to build **fact and dimension tables**, enabling **5+ dashboards** for business reporting
- Implemented **incremental loading** with **dbt** (partition-based models instead of full refresh), decreasing processing time by **90%** on large-scale datasets

PROJECTS

Data Lakehouse Pipeline (Medallion Architecture)

02/2026 – 04/2026

GitHub Repository: <https://github.com/duckthihn/job-listings-datalakehouse> 

- Built an **end-to-end data pipeline** crawling **70+ IT jobs daily** from 2 sources (ITviec and TopCV) and orchestrating workflows with **Airflow DAGs** (ingestion → validation → transformation → aggregation), enabling automated and reliable data processing
- Built a **lakehouse architecture**, by implementing **Medallion Architecture (Bronze/Silver/Gold)** with **Apache Iceberg (table format)** on **MinIO (object storage)** and processing data through **5 PySpark jobs**, improving data organization, transformation efficiency, and query performance
- Improved data quality and real-time access, by integrating **Great Expectations** for **validation** and building a **Discord bot** with **Trino queries**, enabling **job insights** and **salary alerts**

Data Synchronization: MySQL to MongoDB

05/2025 – 07/2025

GitHub Repository: <https://github.com/duckthihn/Data-Synchronization-Pipeline> 

- Developed a real-time **CDC pipeline** using **Kafka** and **Spark Streaming** to synchronize **MySQL** data into **MongoDB**
- Designed workflows to handle **INSERT, UPDATE, DELETE** events with low latency
- Ensured **99.9% data consistency** through automated validation processes

TECHNICAL SKILLS

Programming: Python, SQL (Intermediate)

Big Data Processing: Apache Spark (PySpark, SparkSQL), Kafka, dbt, Hadoop

Data Orchestration: Airflow, Dagster

Data Visualization: Superset, Seaborn, Tableau, Power BI

Databases & Storage: MySQL, PostgreSQL, MongoDB, Redis, MinIO

Cloud & DevOps: AWS (Glue, S3), Docker, Linux, Git

EDUCATION

Swinburne University of Technology

09/2022 – 12/2025

Bachelor of Computer Science (Data Science)

- **Scholarship:** Awarded **40%** merit scholarship
- **Key Courseworks:** Big Data Architecture, Database Management, AI for Engineering, Cloud Computing

CERTIFICATES

- Grab Tech Bootcamp 2025 Certificate
- Google Data Analytics Professional Certificate
- HackerRank SQL (Intermediate) Certificate
